SUPPORT FOR THE UKRAINIAN
PEOPLE AND THEIR NEIGHBORS

We are making our cloud solution Tricefy available – immediately and free of charge – to anyone directly impacted by the violence in Ukraine.

Tricefy connects patients and healthcare providers in a time of crisis:

➤ **There is an extreme shortage of physicians as they are drafted or on the move.** Remotely read and consult on medical images and data. Immediate access for patients and healthcare professionals to images on any device, anytime.

➤ **Expecting families are separated from their loved ones and can't have these experiences face to face.** Allow patient access to their medical records and images, remotely.

➤ **Physical archives of patient records are under threat of destruction.** Safely store and access medical records.

We connect you remotely, free of charge. All you need is an internet connection and an imaging device.

- Are you in need of a patient sharing, clinical collaboration, and reporting platform?
- Can you provide clinical support? (e.g. volunteer to read images)
- Can you help us spread the word?

Take action:
